18mm Tempered Safety Glass composition:

6mm outer Tempered Glass

6mm insulating Airspace

6mm inner Tempered Glass

High-Performance insulation against heat and noise.

UV Protection and enhanced impact resistance.

► Maximum Size ✓

Up to 900mm x 1500mm

Suitable for a variety of residential and commercial applications.

Custom sizing options may be available upon request.

► Frame Available ✓

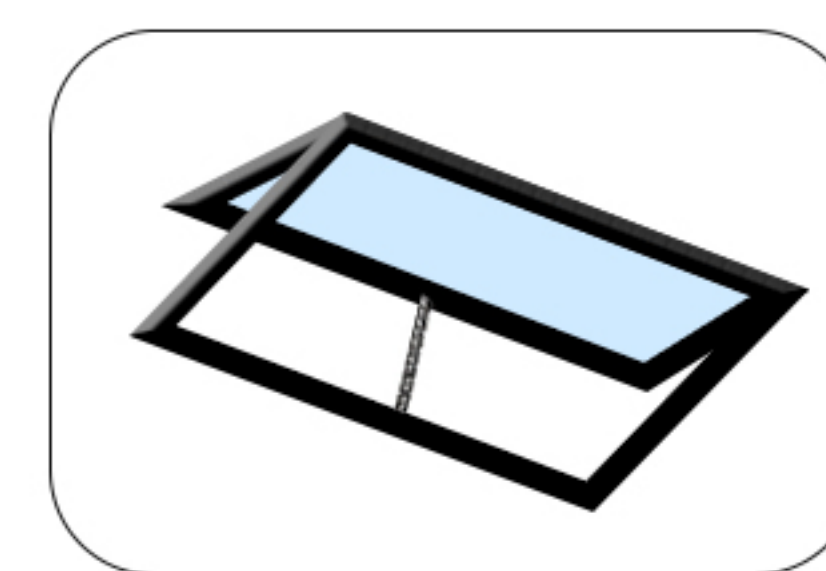

Matt Black, Matt Brown and Matt White.

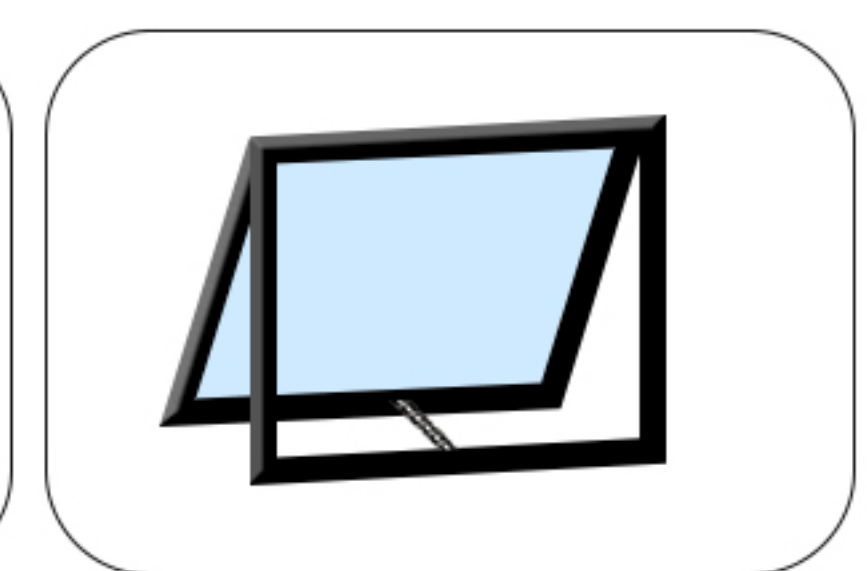

Fresh Air Ventilation

Automatic skylight is a smart, motorized window installed in the roof that opens and closes automatically to provide natural ventilation and improve **indoor air quality**. It helps regulate temperature, reduce humidity, and bring in fresh air without relying solely on mechanical systems. Often integrated with sensors for rain, temperature or CO₂ levels, automatic skylights are an energy-efficient solution for maintaining a healthy indoor environment while also enhancing natural lighting.

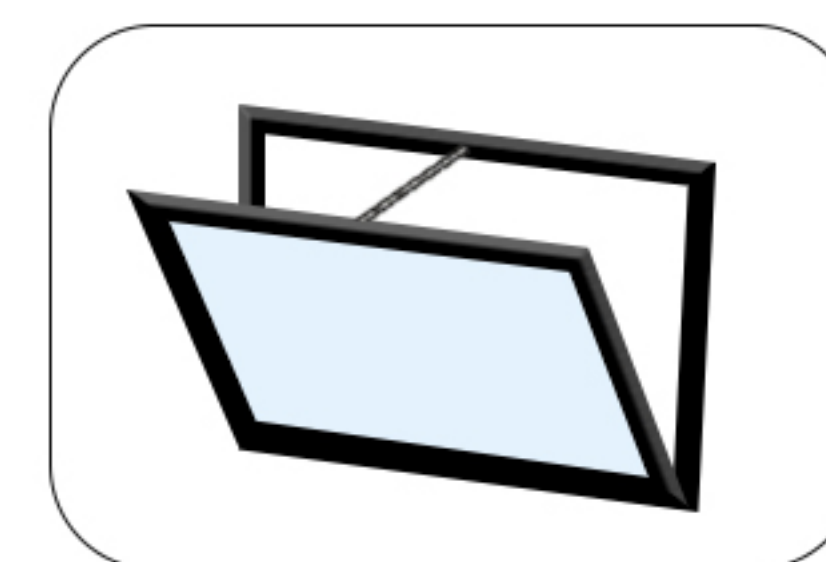

Compatible Window Type

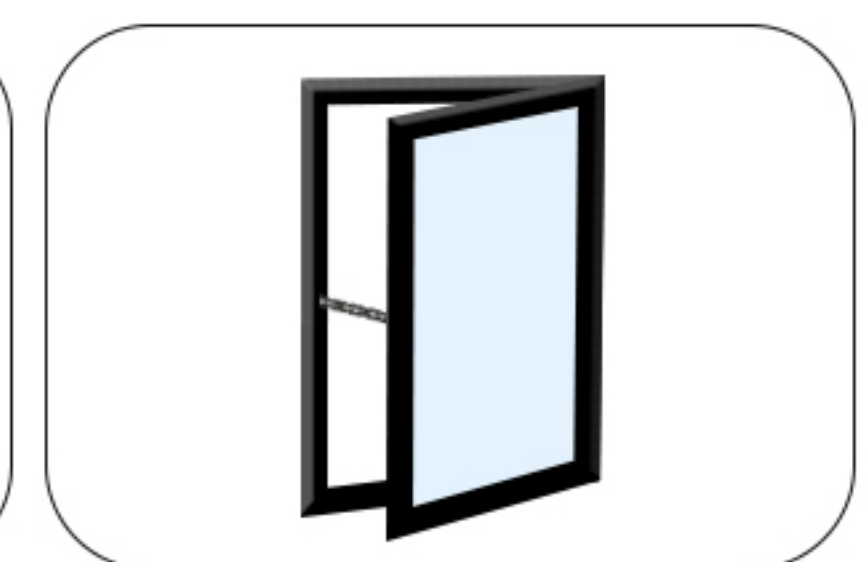

Skylight

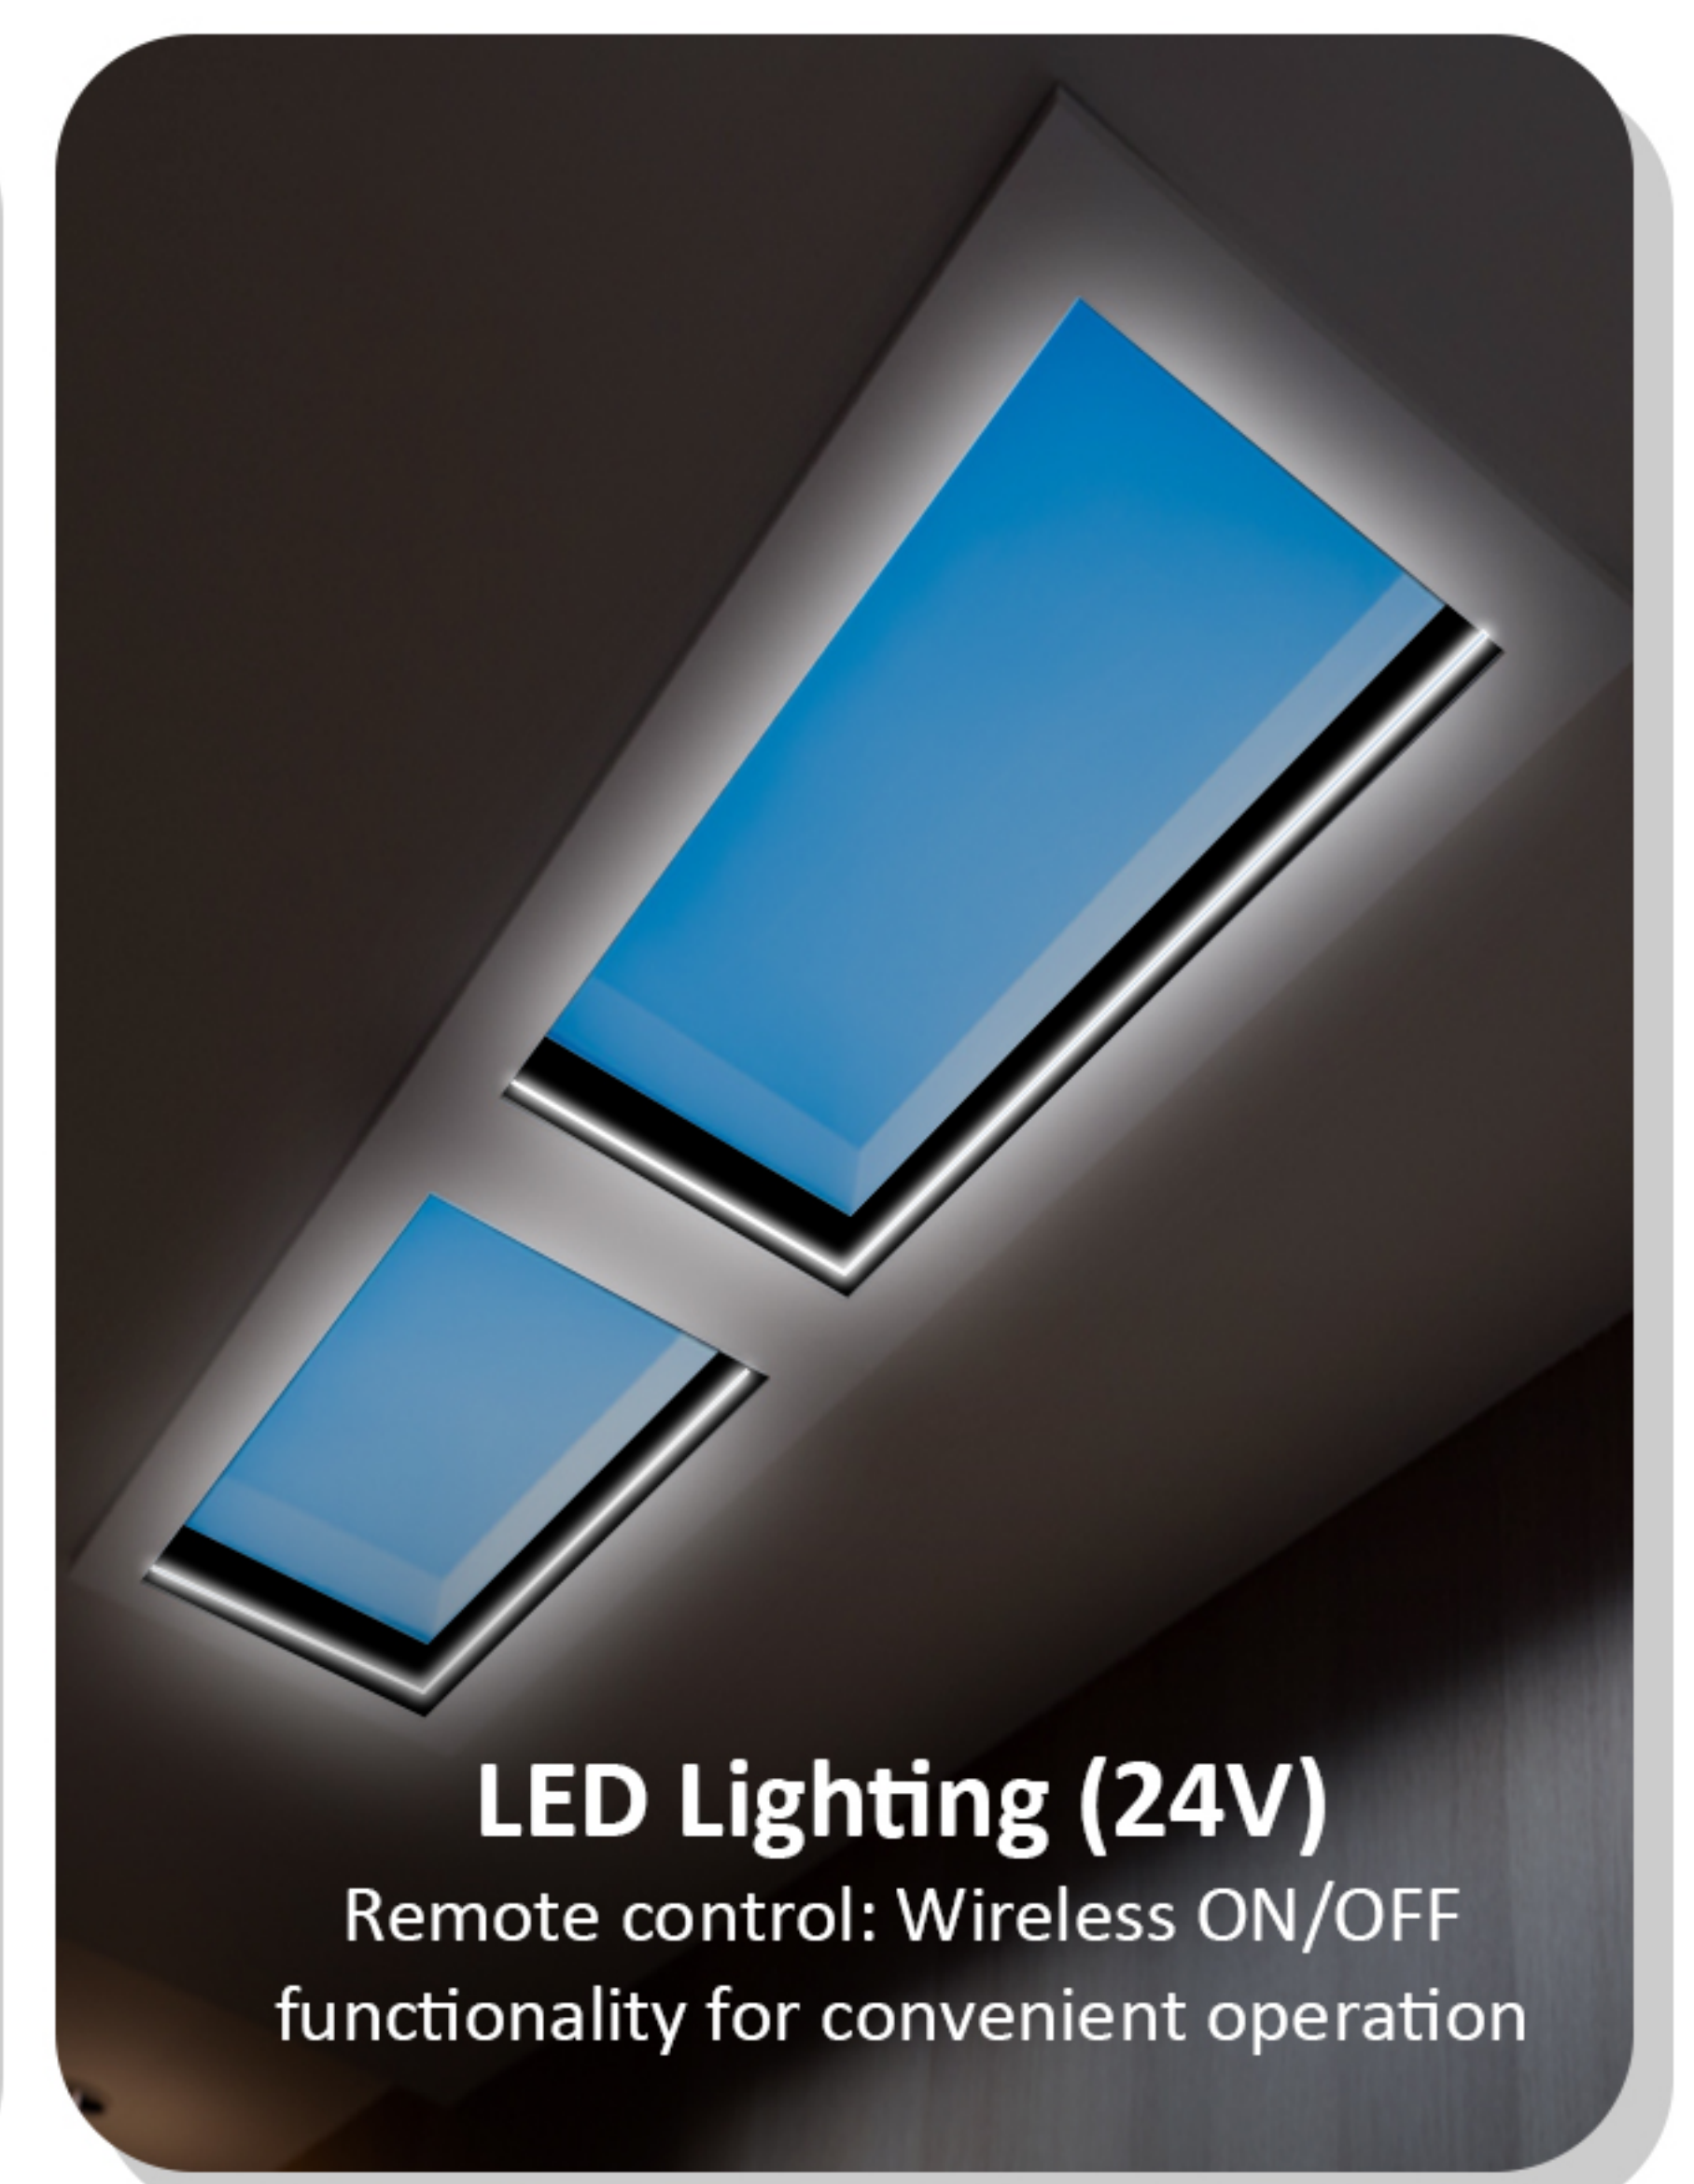

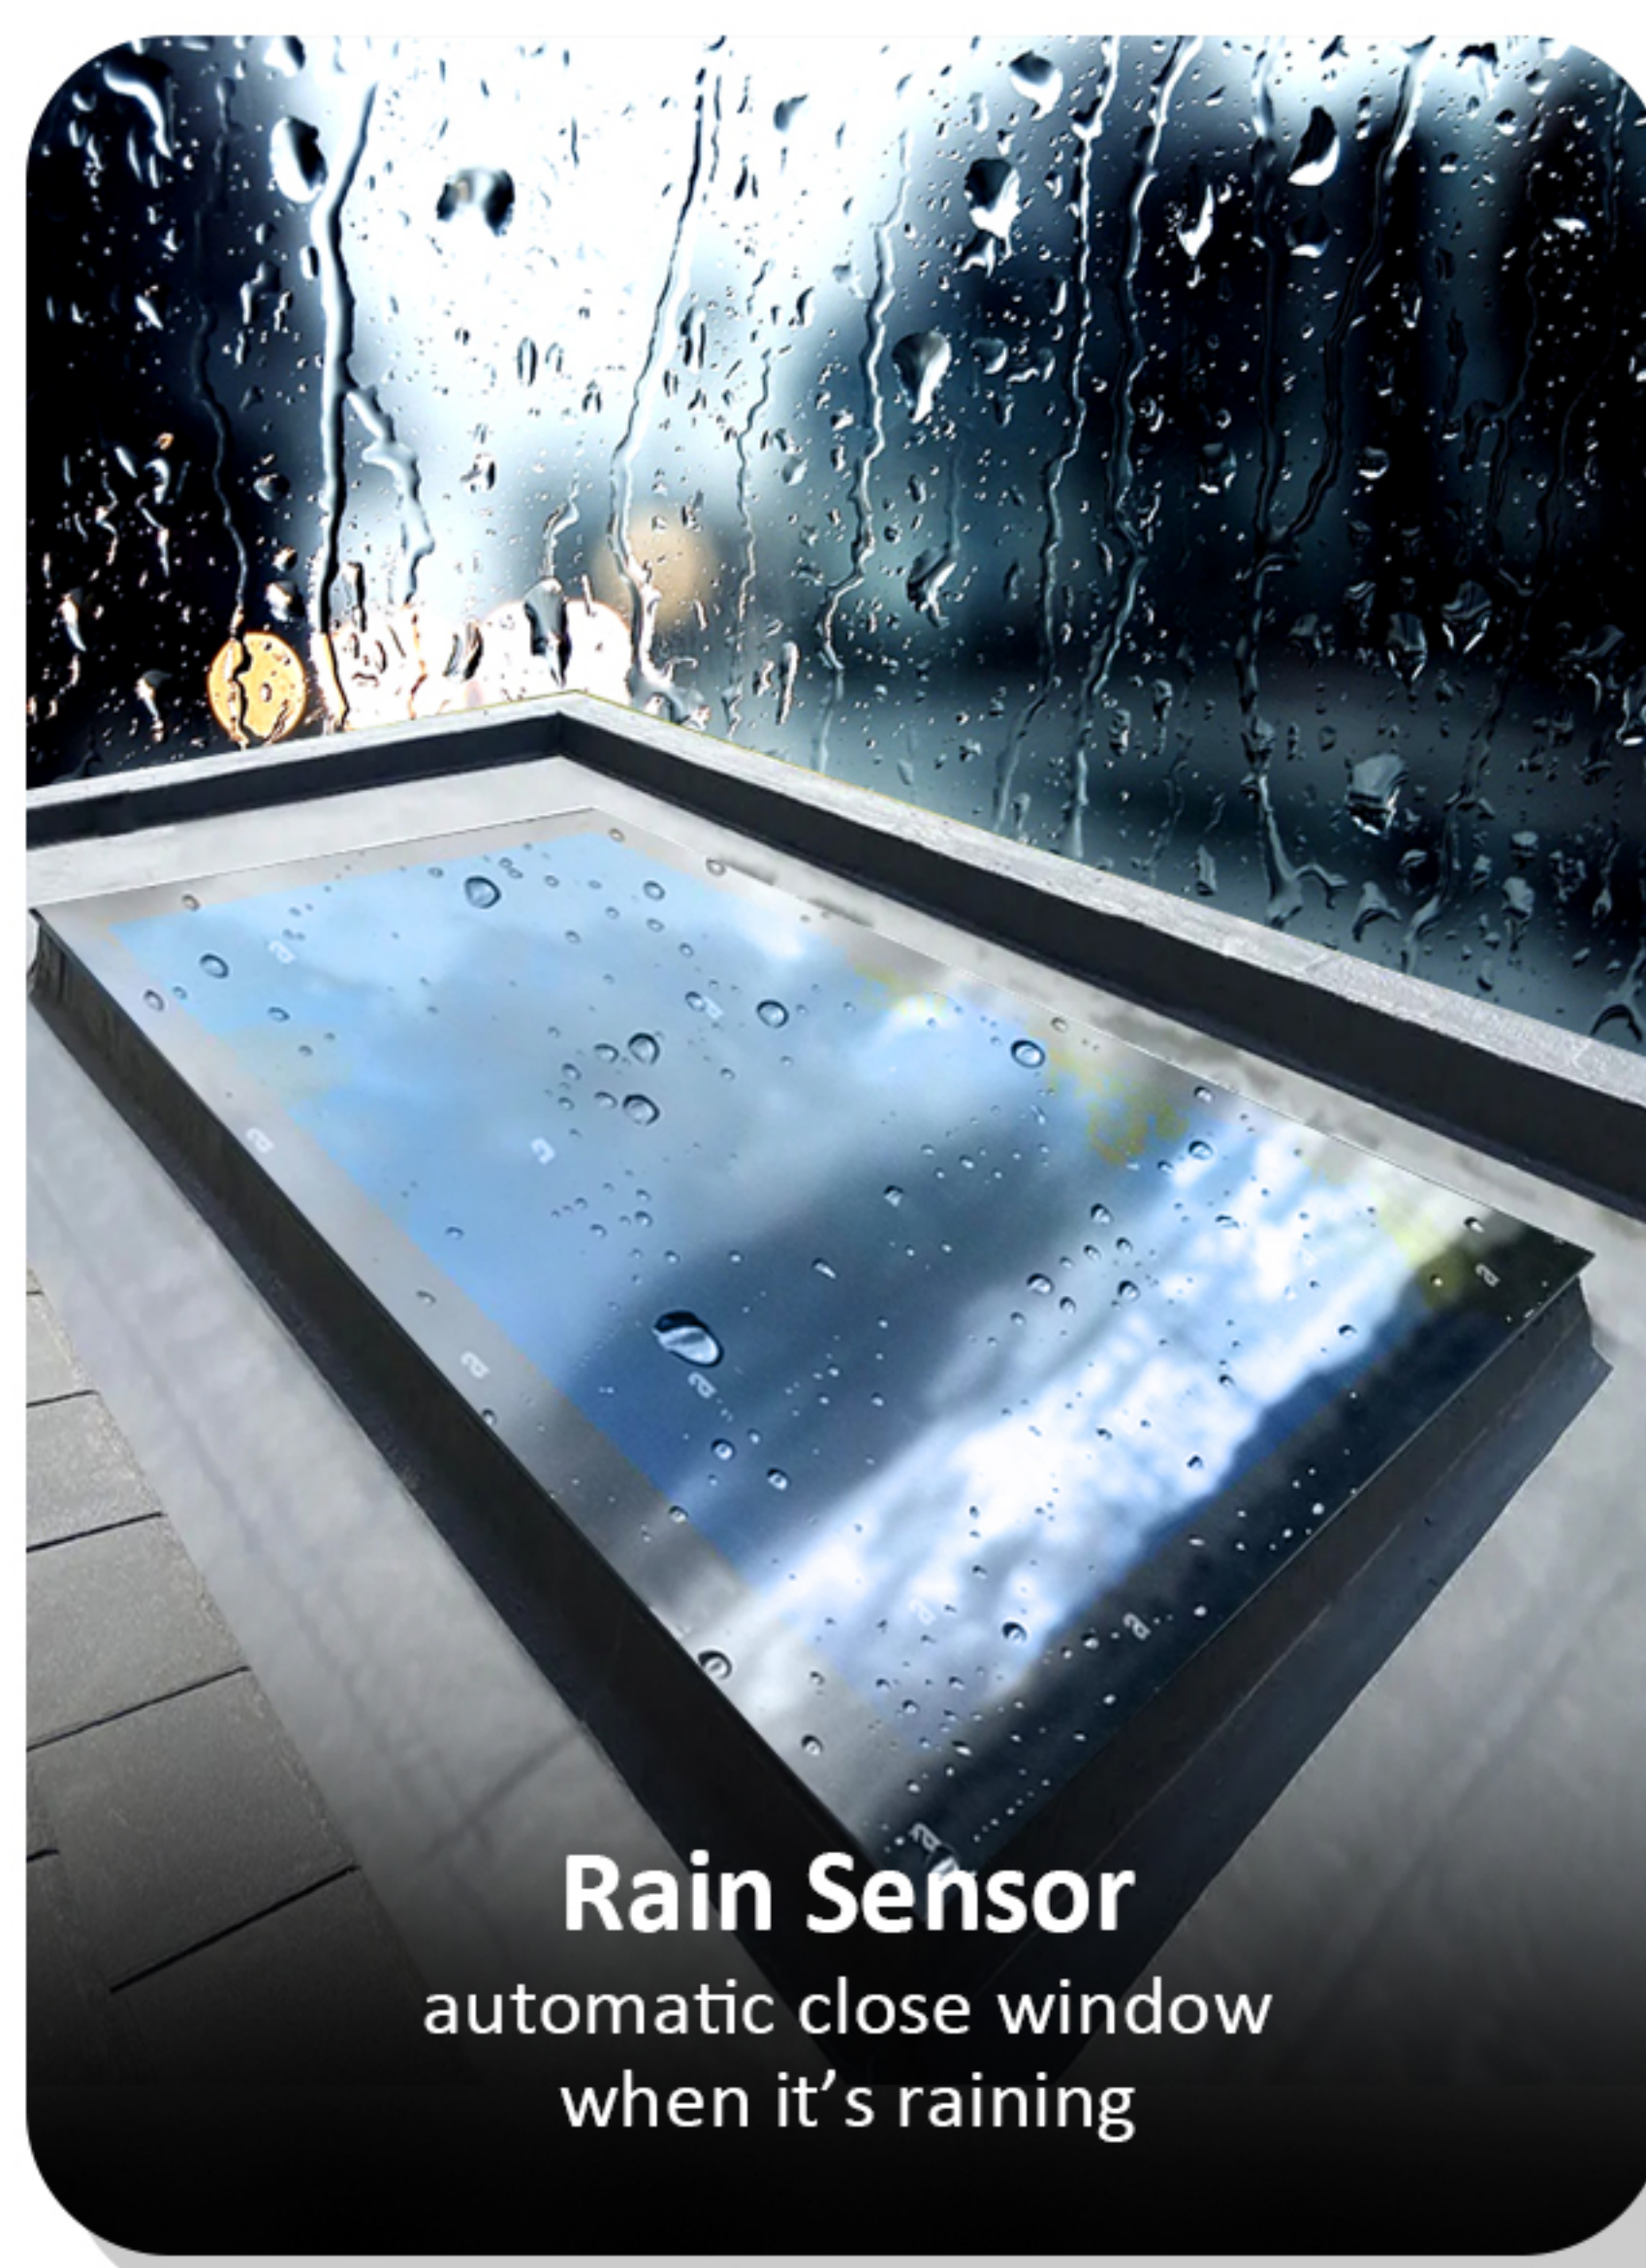

Top-Hung Window

Bottom-Hung Window

Side-mounted window

Automatic Skylight Openers
