

MALAYSIA'S #1
ENERGY-GENERATING WALL SYSTEM

SOLARWALLTM

FAR EAST GREEN ENERGY BRAND INTRODUCTION

Powering Buildings with Light,
Making the World More Beautiful

+ SIX CORE TECHNOLOGIES

> **BIPV Technology** (Building Integrated Photovoltaics)

Solar photovoltaic (PV) modules are integrated into building facades, serving both as construction materials and green power generators, enabling buildings to generate power.

> **Super High-Rise Building Curtain Wall System Technology**

A curtain wall system designed to address challenges such as wind pressure resistance, thermal deformation, and precision installation in super high-rise buildings, ensuring safety and airtightness.

> **Complex Double-Curved Curtain Wall System Technology**

A curved curtain wall technology based on digital design and CNC molding, achieving high-precision manufacturing and installation of curved facades.

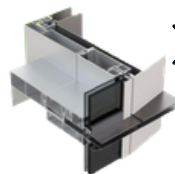

> **Environmentally Friendly** **Curtain Wall Technology**

A curtain wall system integrating low-carbon materials and energy-saving structures, reducing energy consumption to support carbon reduction throughout the building's lifecycle.

> **Special Curtain Wall Technology**

High-performance curtain wall solutions developed for extreme environments or specific functional requirements (e.g., blast resistance, seismic resistance).

> **MIC Curtain Wall Design** (Modular Integrated Construction)

A highly efficient integrated construction method where curtain wall units and the main building structure are prefabricated simultaneously in factories, enabling rapid on-site assembly.

BEYOND LIGHT, BUILDING A LOW-CARBON FUTURE

Far East Green Energy focuses on green, low-carbon building solutions by integrating solar photovoltaic (PV) technology into buildings, helping reduce energy consumption and support sustainable urban development.

> CORPORATE CAPABILITIES

Innovative Products
Empowering Green Buildings
and 'Dual Carbon' Goals

Independent R&D, testing, and mass production
mastering core technologies and processes.

Started operation: **May 2025**

Produces : Fritted glass & BIPV components
in different sizes

Advantages:

- ✓ Large-size product manufacturing
- ✓ High wind-pressure resistance products
- ✓ Intelligent production devices
- ✓ One-stop BIPV solutions

LIGHT PRO FACADE™

Comprehensive Protection, Peace of Mind

- Static wind pressure resistance : 15.4 kPa, capable of withstanding Category 17 typhoons.
- Class A fire rating, ultimate fire safety.
- Strong overall rigidity, outstanding anti-micro-crack capability.
- Installation with embedded nuts and bolts, significantly enhanced strength.

— Five standard colors :

Dawn Blue

Slate Gray

Antique Gold

Sage Green

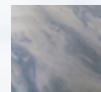

Ruby Red

Haimarble

Elegrotto

Rhythmstone

Light Pro facade products
can be customized in
various colors and
stone-grain appearances.

Rooftop
Dimensions : 1134 x 2382

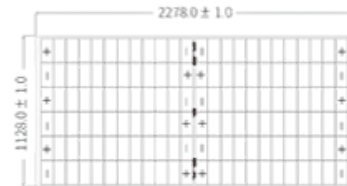

Facade
Dimensions : 1128 x 2278

LIGHTPRO FACADE™

Technical Parameter

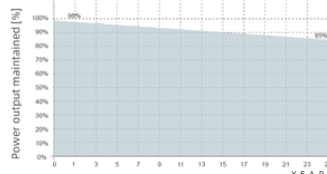

Battery arrangement	ABC /144 (72x 2)
Connecting box	IP68 protection rating
Export wire (including connectors)	4.0mm ² , (wire length) ±650 mm; or customized
Glass	Double-pane glass: 3.2mm colored enamel glass + 2mm semi-tempered glass (customizable)
Product weight	64kg
Product size	1128 x 2278mm(Customizable size)
Working temperature	-40°C~85°C
Power tolerance	± 5W
Nominal operating temperature	45±2°C
Component fire resistance rating	Class A (IEC 61730/UL790)
Maximum backplane static load	9000Pa
Through hail testing	Diameter 25mm, impact velocity 23m/s

Dawn Blue 200 ~ 210W/m²
Slate Gray 200 ~ 210W/m²
Sage Green 200 ~ 210W/m²
Antique Gold 160 ~ 170W/m²
Ruby Red 150 ~ 160W/m²

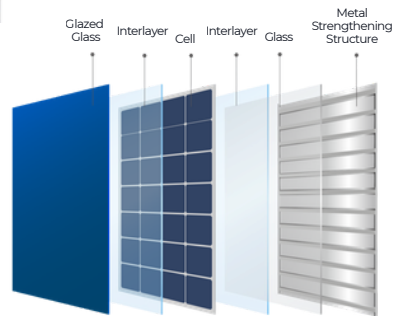

21% **<1.0%** **<0.5%**

max conversion efficiency first year power attenuation Annual power attenuation from 2-25 Years

BIPV Products Feature Far East Green Energy's Proprietary High-Performance Colored Enamel Glass.

*The above parameters are for reference only. Please refer to the project design and customization details for specific requirements.

BIPV PRODUCT INTRODUCTION

Independently developed top-tier products,
continously leading and serving the times.

2⁺

LESS LOSS, MORE POWER GENERATION

210 W/m²

Maximum Power

17K kWh

Annual Power Generation

5 households

Equivalent to electricity
3391 kwh annually

731 trees

Carbon Reduction

Data source: State Grid - 1 kWh of clean electricity saves 305.5g of standard coal,
reduces 751.53g of CO₂ emissions, equivalent to planting 0.043 trees

> Architectural Aesthetics

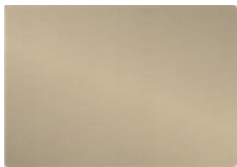

Custom Fritted Glass Series

Surface Effect

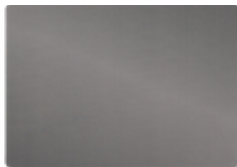

Custom Fritted Glass Series

✓ Tangible Texture . Ultra-high fidelity . Rejects light pollution.

✓ Lower loss . More Power generation **(Power loss < 10%)**

Extreme Performance Shaping Curtain Wall Quality

Far East Green Energy

Certified Photovoltaic Components

TÜV - German Technical Inspection Association
CE - EU Conformity Certificate
COC - Singapore Certificate of Conformity

5

Passed Curtain Wall EN/BS Four- Performance Tests

- **[Fire Resistance]** Achieves **Class A** flame-retardant rating, fire-resistant and non-combustible.
- **[Air Tightness]** Achieves National Standard Grade 8, European Standard **A4**, powerful performance.
- **[Water Tightness]** **RE**, effectively resists rainwater penetration under pressure.
- **[Wind Load Resistance]** Passed maximum wind pressure test of **15.4 kPa**, can withstand Category 17 typhoons.

FEATURED PROJECTS

LIGHT - Illuminating the Boundless Future

3⁺

Deep Expertise in Large Building Scenarios

Technology Leading :

Photovoltaic facade products adapt to various building forms, overcoming installation challenges in complex scenarios.

Significant Benefits:

triple value empowerment through power generation revenue + energy saving & consumption reduction + carbon reduction certification

Rich Experience:

Coverage across over 60 cities nationwide

COMMERCIAL BUILDINGS

160,000 kWh

Photovoltaic Building Materials

- Submit product requirements (standard/custom products).
- Far East Green Energy R&D and production.
- Quality inspection and transportation to project site.

EPC Engineering

- Client company invests its own funds to build the PV power station.
- Tender to determine EPC contractor, responsible for design, procurement, and construction.
- Possesses necessary permits: work safety license, construction labor license, power facility installation (repair, testing) license, and relevant qualifications.

Energy Management

- Integrates resources within the group to conduct energy management business through industrial synergy.
