

KINETIX™

MOTION PRO

SLIDING SYSTEM

GAME CHANGER: MODULAR ROOM-IN-ROOM SYSTEM

Move Up to **10 Sliding Doors**
effortlessly with One Finger.

KINETIX™ Motion PRO Sliding system enables **smooth bi-directional sliding** and **compact stacking**, creating **flexible, space-saving layouts**. With **no floor guide required**, it ensures a **clean installation** even on **uneven floors**.

Featuring a **slim frame**, **concealed screws**, and **easy maintenance**, the system delivers a **sleek modern look** with **fast installation**. Its **modular design** allows **full customization** to fit your space.

NEXT GENERATION SIMPLE, EFFICIENT AND FLEXIBLE.

DURABLE

Reversible roller technology with removable roller units for easy maintenance.

INNOVATIVE TWO-WAY DAMPING

One integrated two-way damper enables smooth closing from both sides, supporting door widths from 600 mm while saving space.

HIDDEN TECHNOLOGY

Integrated synchronization technology minimizes panel gaps for a cleaner look, with no cover panels or visible drill holes.

UP TO 10 DOORS SEAMLESSLY

With Perfect system, up to 10 doors can be installed in a row.

DISCREET FRAME DESIGN

Integrated technology creates a slim frame with no cover panels.

SAFE IS SAFE

Optional sliding door lock for added security.

EASY SLIDE

Special synthetic rollers ensure smooth, stable gliding with no shaking and no floor marks.

NO FLOOR GUIDANCE RAILS

No visible floor guide rail for a clean look and trip-free access.

PERFECTION IN DETAILS:

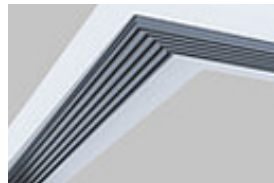

SMALL THINGS.

BIG EFFECT.

FEATURE	CONVENTIONAL SYSTEMS	KINETIX™ MOTION PRO SYSTEM
Cover/ Frame	High assembly effort, high structure.	The complete system/running technology is installed in the lower profile, resulting in a small gap. No cover panel required and narrow frames can be realised. No disruptive drill holes or screws visible.
Floor Guide	Fixed floor guide required.	Special pressure rollers function in the lower area, which ensure extreme stability and running quality. No fixed floor guide required. Uneven floors are levelled out and doors are extremely easy to slide.
Profile Cut	Frame profiles must be cut at a 45° angle.	Straight profile cuts, the profiles are covered by the drive. Quick and easy installation – also thanks to our intelligent installation features.
Running Technology	Running and synchronisation technology are permanently installed together in the upper section.	It is 4 ways reversible thanks to the dismountable roller technology. The roller units can be easily removed, e.g. to fill the integrated oil tank.
Number of Doors	Depending on the number of tracks, this is system-limited with a maximum of four doors.	Thanks to the new, innovative connection technology, up to 10 doors can be mounted one after the other which can be parked easily and compactly.

BUILD TO ORDER

As Simple as It Is Genius.
One Kit. Everything Included.

Sustainable & Cost-Saving
Modular System

The KINETIX™ Motion PRO system offers **flexible sliding door solutions** for **wall-mounted** or **ceiling-mounted installations**. Create multi-leaf sliding doors by combining individual systems, or use dedicated kits for **glass partition walls with three or more doors**.

Each kit includes essential components such as **fittings, rail system, and aluminium frame**. Customise your setup based on **installation type and door quantity** - order only what you need, reducing waste and saving costs.

Explore our **customised solutions** below.
